Seongsoo An

M.S. Student in AI | Law and Policy Lab, GIST
Email: seongsoo1020@gmail.com **Website:** jipo1.github.io

Research interests

Trustworthy AI
LLM Alignment & Fine-tuning
AI Evaluation
AI Fairness & Bias

Education

Gwangju Institute of Science and Technology (GIST)
M.S. Program in AI
Mar 2025 – Present
Advisor: DoHyun Park
Law and Policy Lab
Overall GPA: 3.91 / 4.5

Pukyong National University
B.S. in Applied Mathematics
Mar 2019 – Feb 2025
Double Major in Statistics and Data Science
Overall GPA: 3.95 / 4.5
Major GPA: Applied Mathematics, 4.13 / 4.5
Double-Major GPA: Statistics and Data Science, 4.27 / 4.5

Research experience

Mitigating Sycophancy in Large Language Models
Law and Policy Lab, GIST
Sep 2025 – Present
Experiments and manuscript in progress

- Designing evaluation protocols for LLM sycophancy across opinion-based and fact-based questions
- Exploring third-person prompt transformations and segment-level reward modeling as mitigation strategies
- Developing training and evaluation workflows involving LoRA and reinforcement learning

Technical skills

Programming: Python, R
Frameworks and libraries: PyTorch, Hugging Face Transformers, scikit-learn, TensorFlow
Methods: Parameter-Efficient Fine-Tuning, Reinforcement Learning, Reward Modeling, LLM Evaluation

Research and collaborative projects

GAI Handbook — Fairness Violations in Generative AI

Law and Policy Lab, GIST
Aug 2026 – Present
In preparation
Collaborating institution: Center for Trustworthy AI (CTAI), Seoul National University

- Independently researched and drafted an initial manuscript covering generative AI fairness risks, legal frameworks, and technical mitigation approaches
- Collaborated with a CTAI researcher to adapt the manuscript into textbook-style prose

AI Policy Guidelines for Cultural Heritage
Law and Policy Lab, GIST
Sep 2025 – Dec 2025

- Contributed technical perspectives on LLMs to AI policy guideline development
- Worked with researchers in law and policy and represented the laboratory in project meetings

Presentations

Fairness Issues in Generative Artificial Intelligence
Erewhon #22, Center for Trustworthy AI (CTAI)
Aug 2026
Presented fairness challenges, regulatory considerations, and mitigation approaches in generative AI

Leadership and campus activities

Student Council Vice President
Department of Applied Mathematics, Pukyong National University
Jan 2023 – Dec 2023

Sophomore Class Representative
Department of Applied Mathematics, Pukyong National University
Mar 2022 – Dec 2022
